

netcopula package

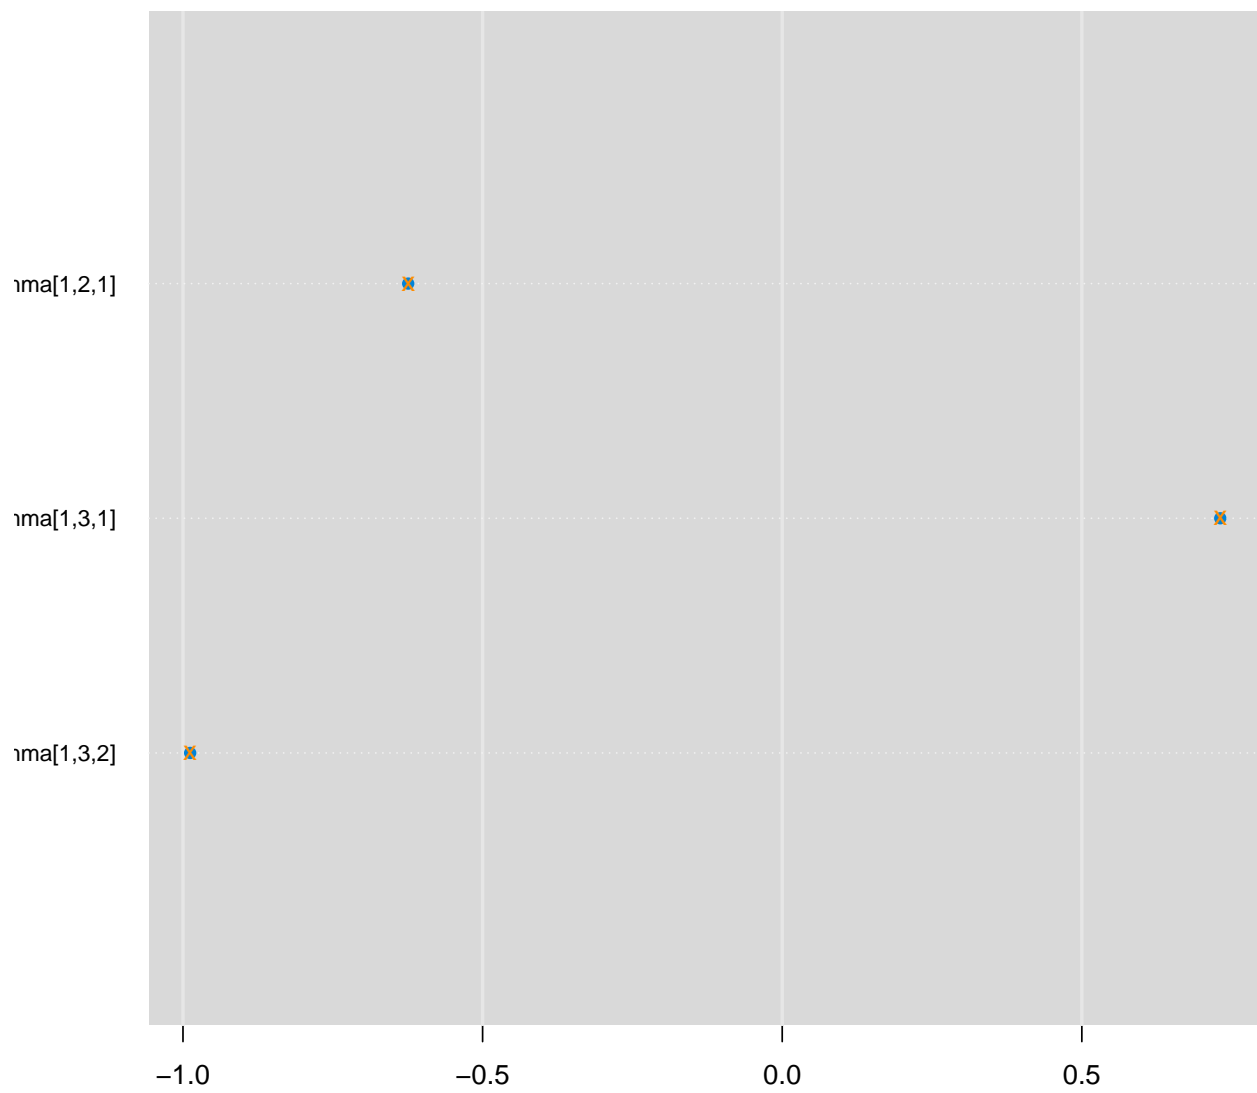

Report at 2016-05-13

Sergio Venturini

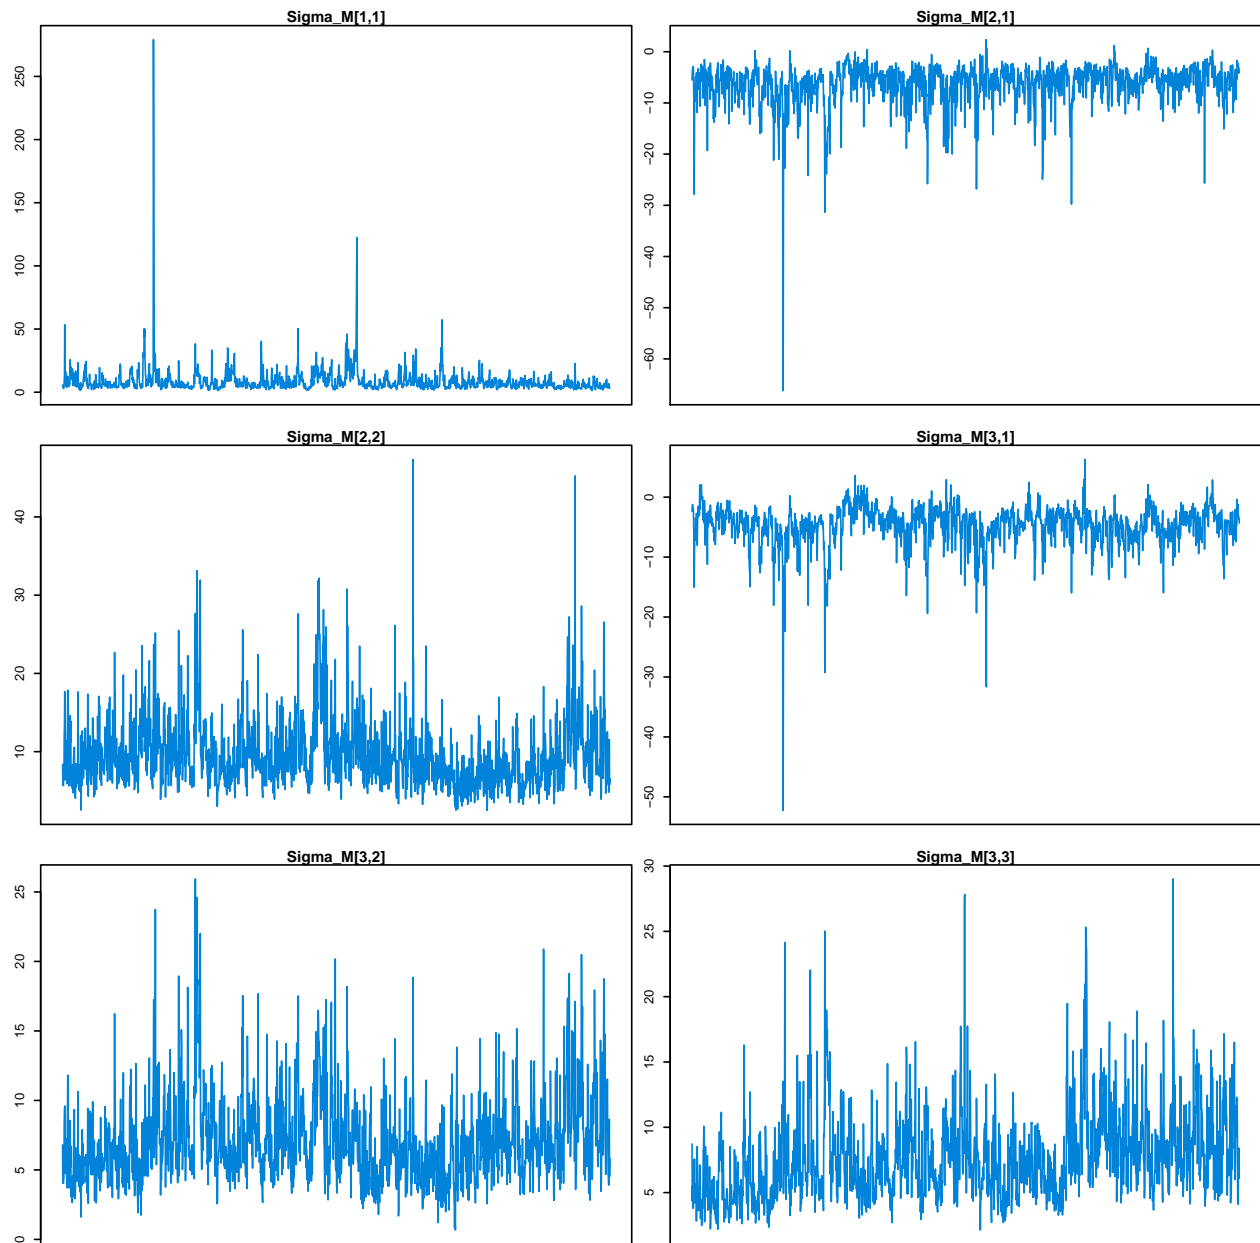

Γ (outcome copula correlation matrix)

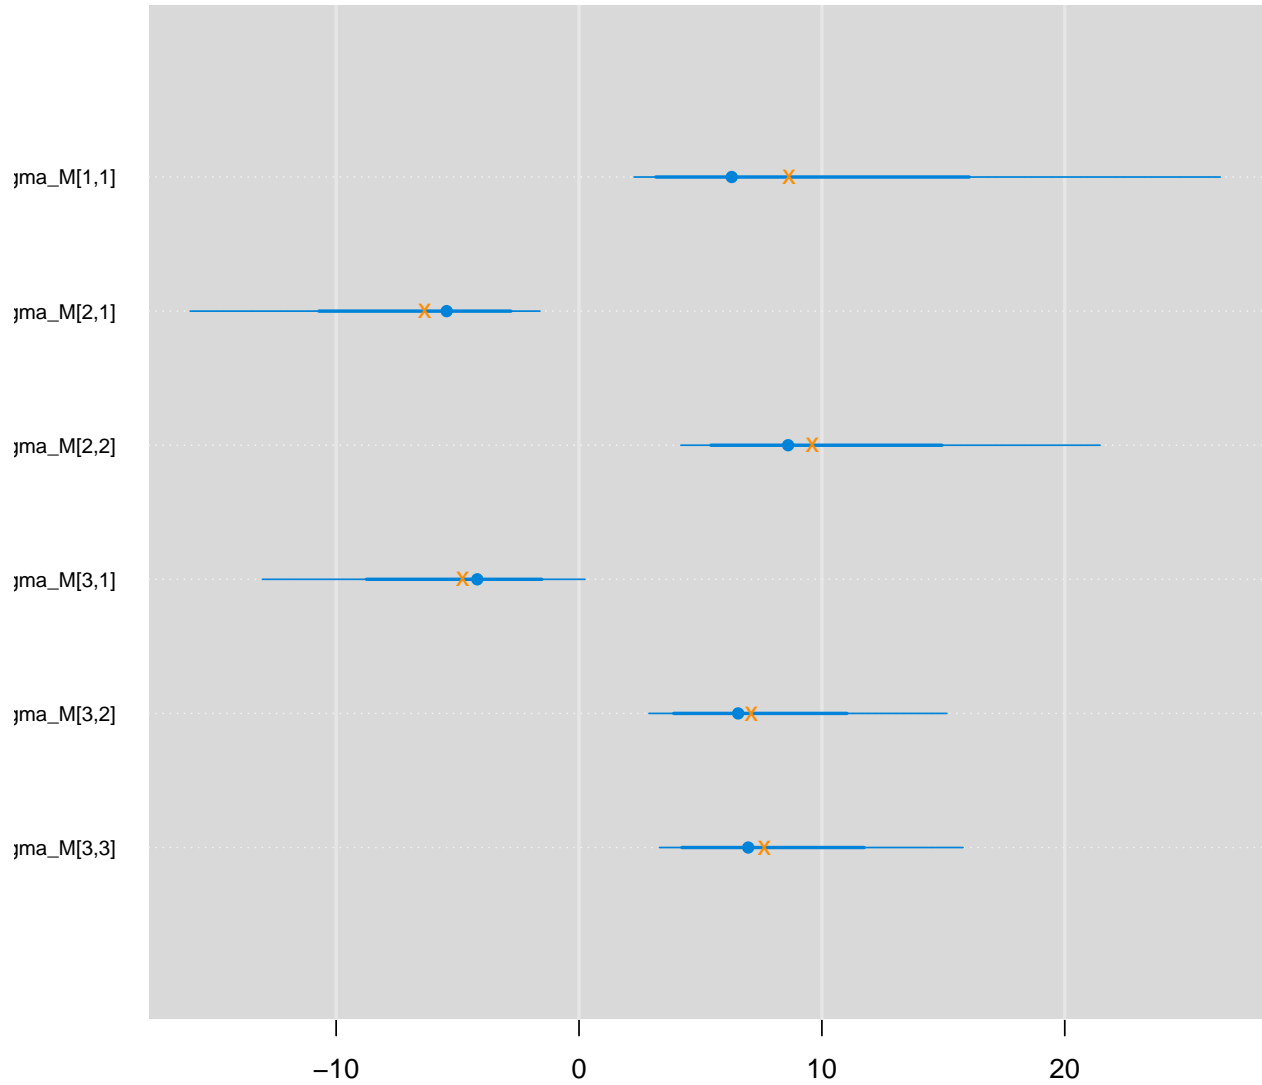

parameters Gamma

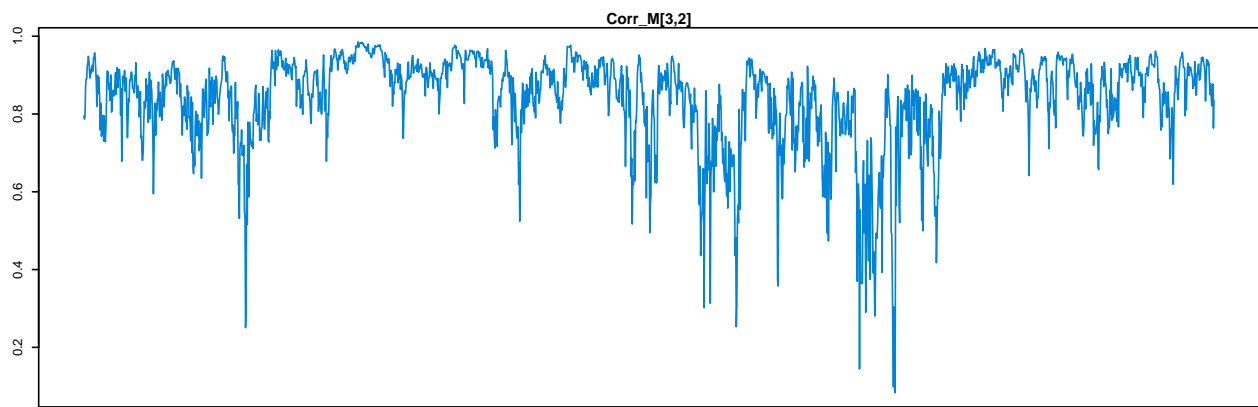

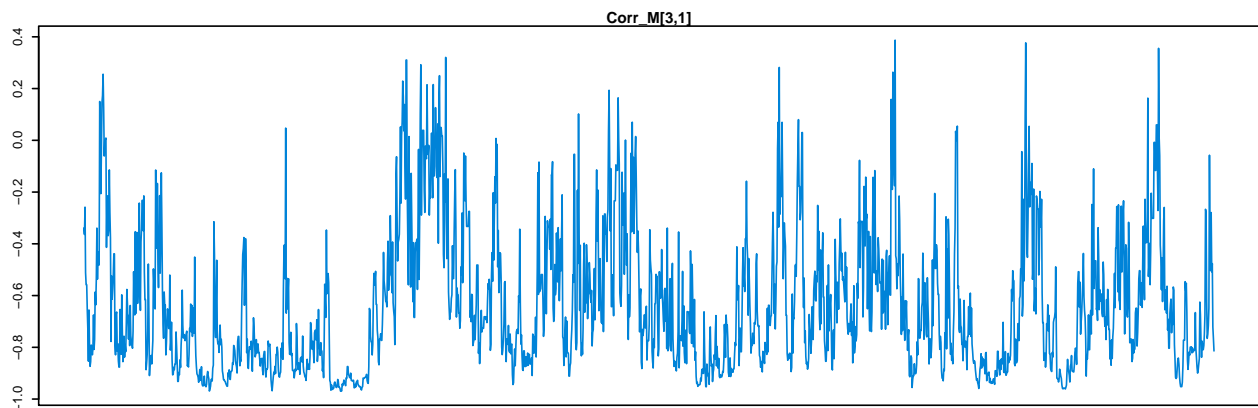

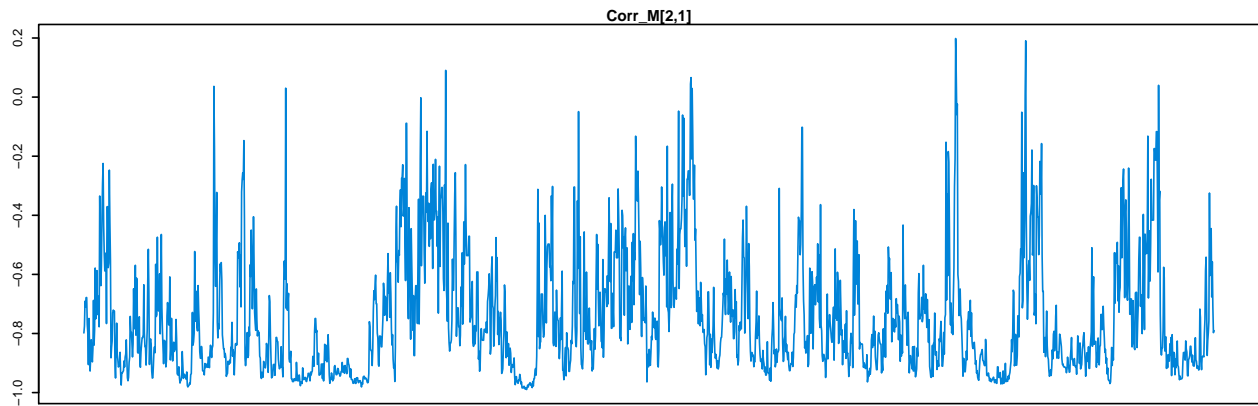

Σ_M (common between-study covariance structure)

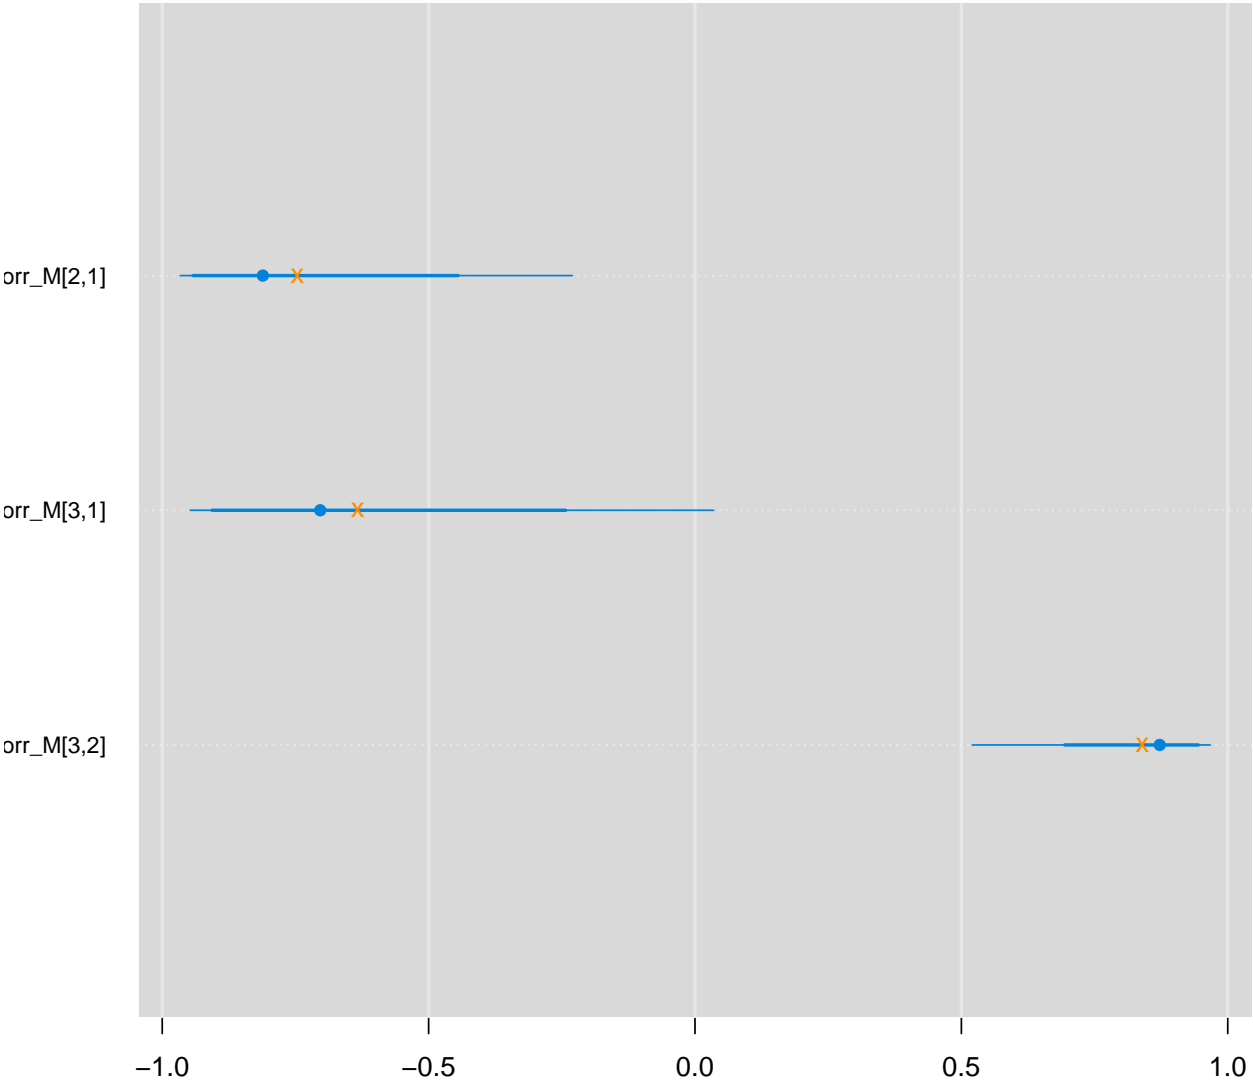

parameters Sigma_M

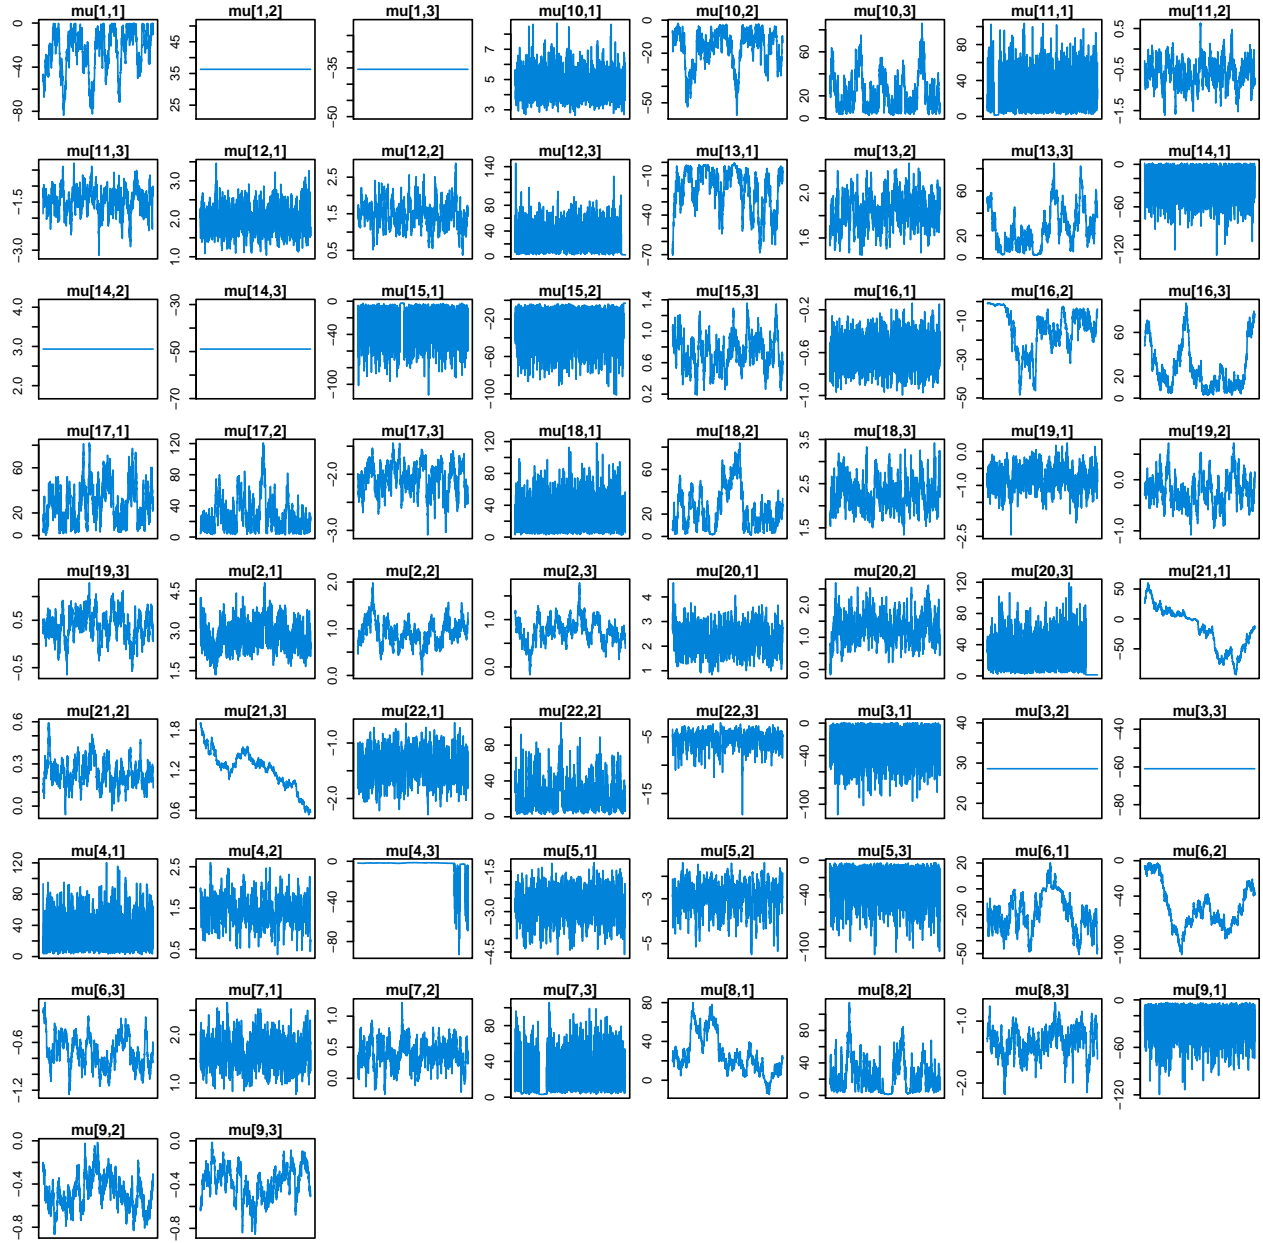

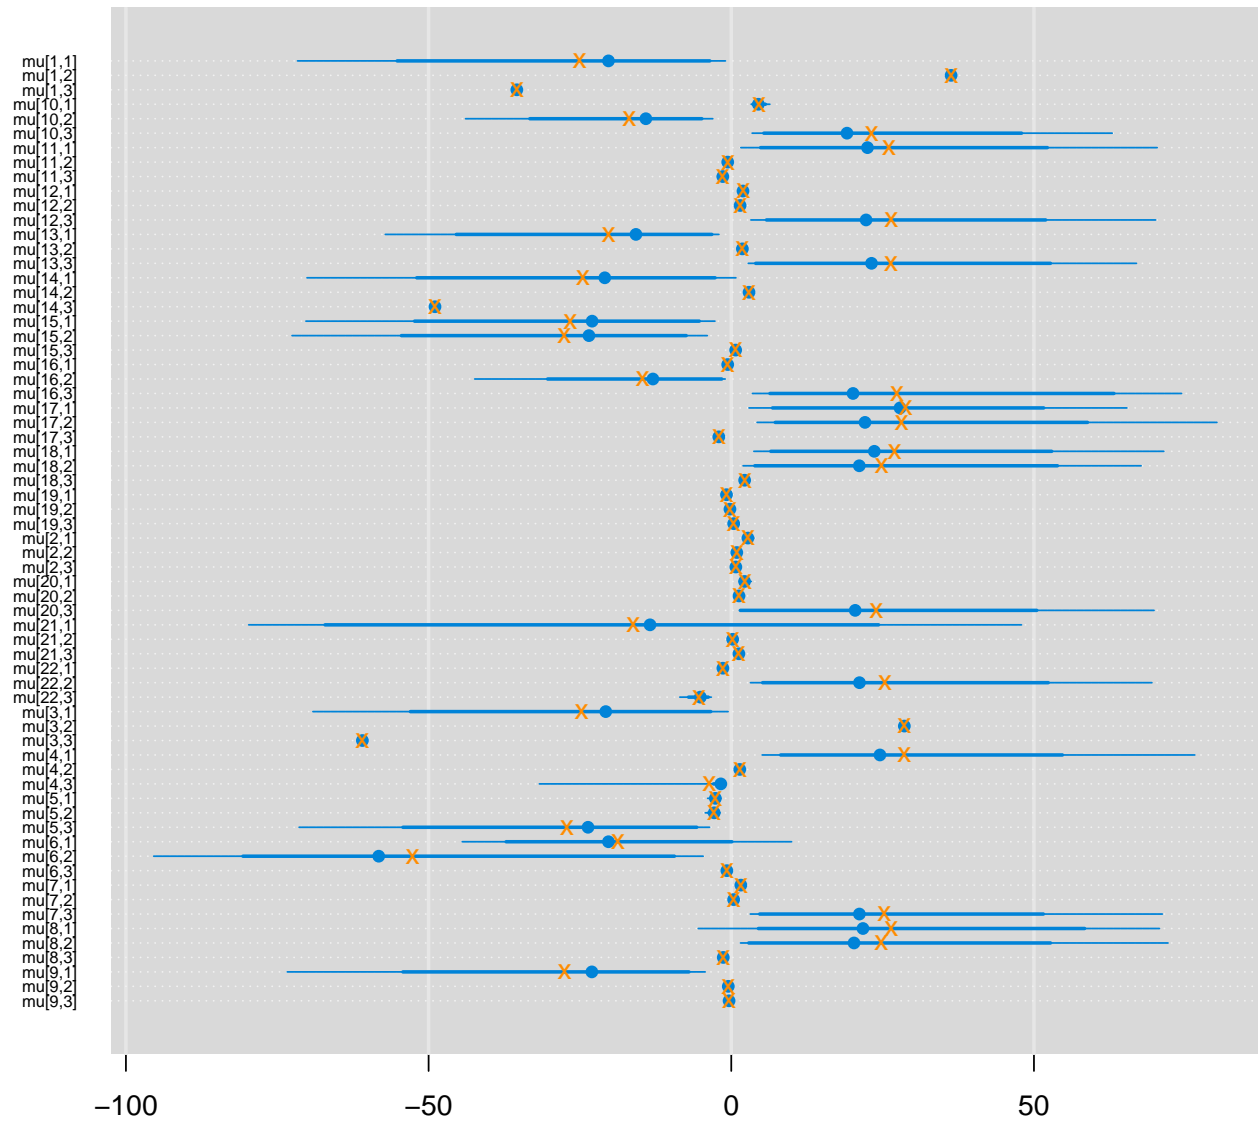

parameters Corr_M

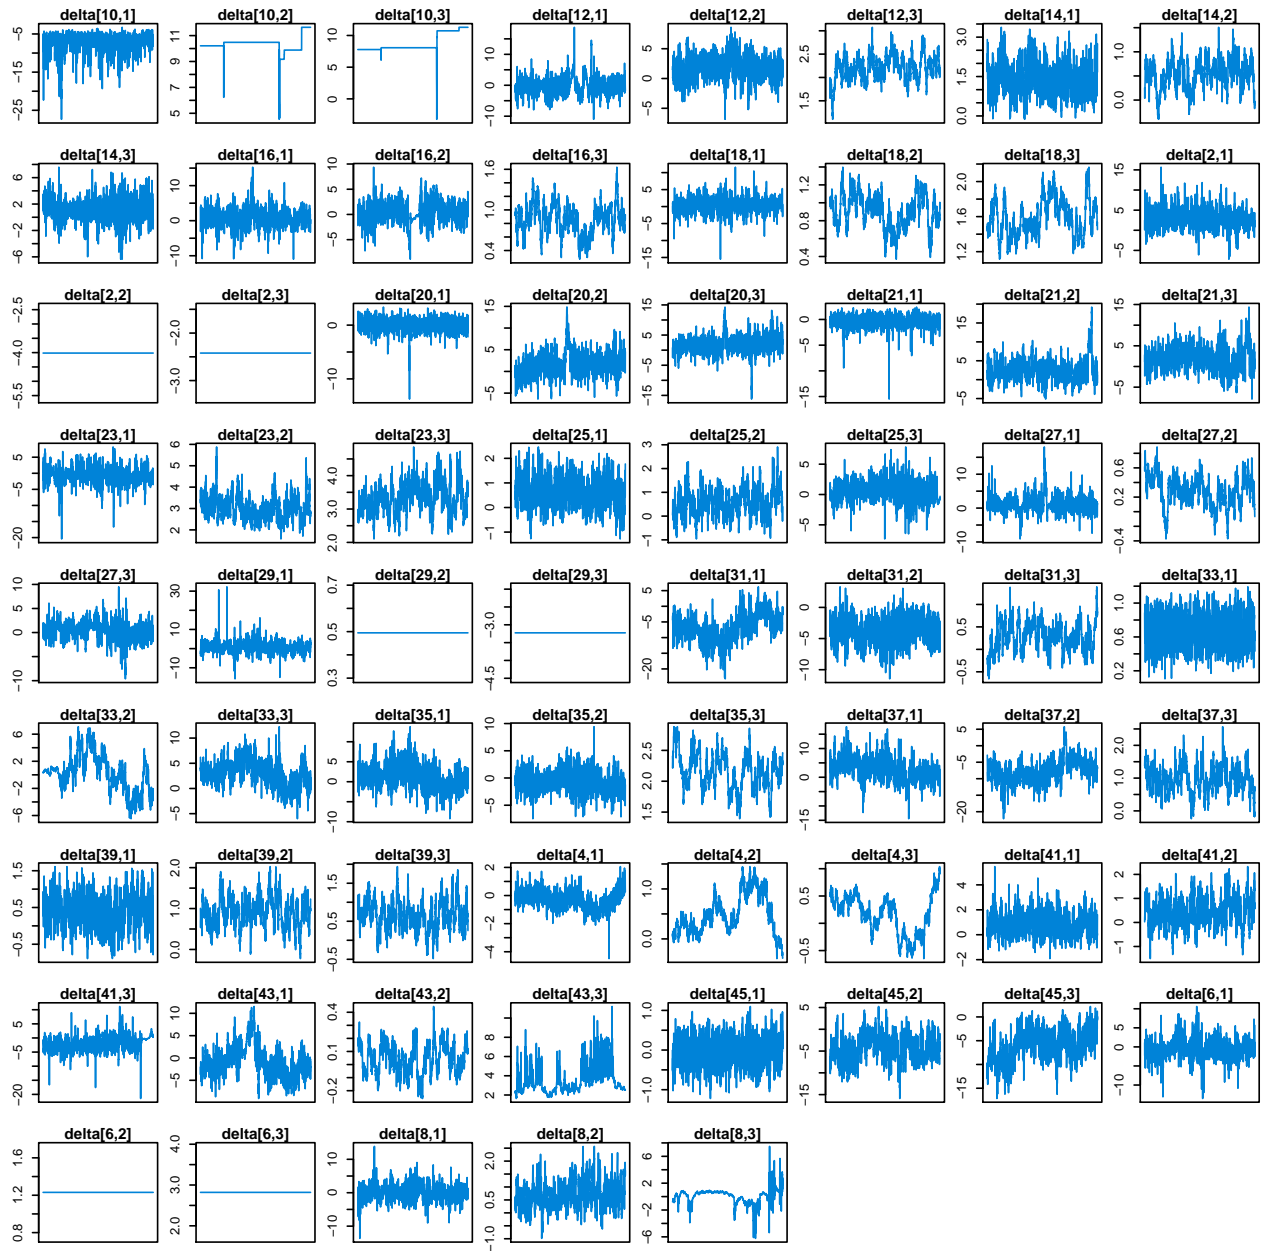

μ (study-specific baseline effects)

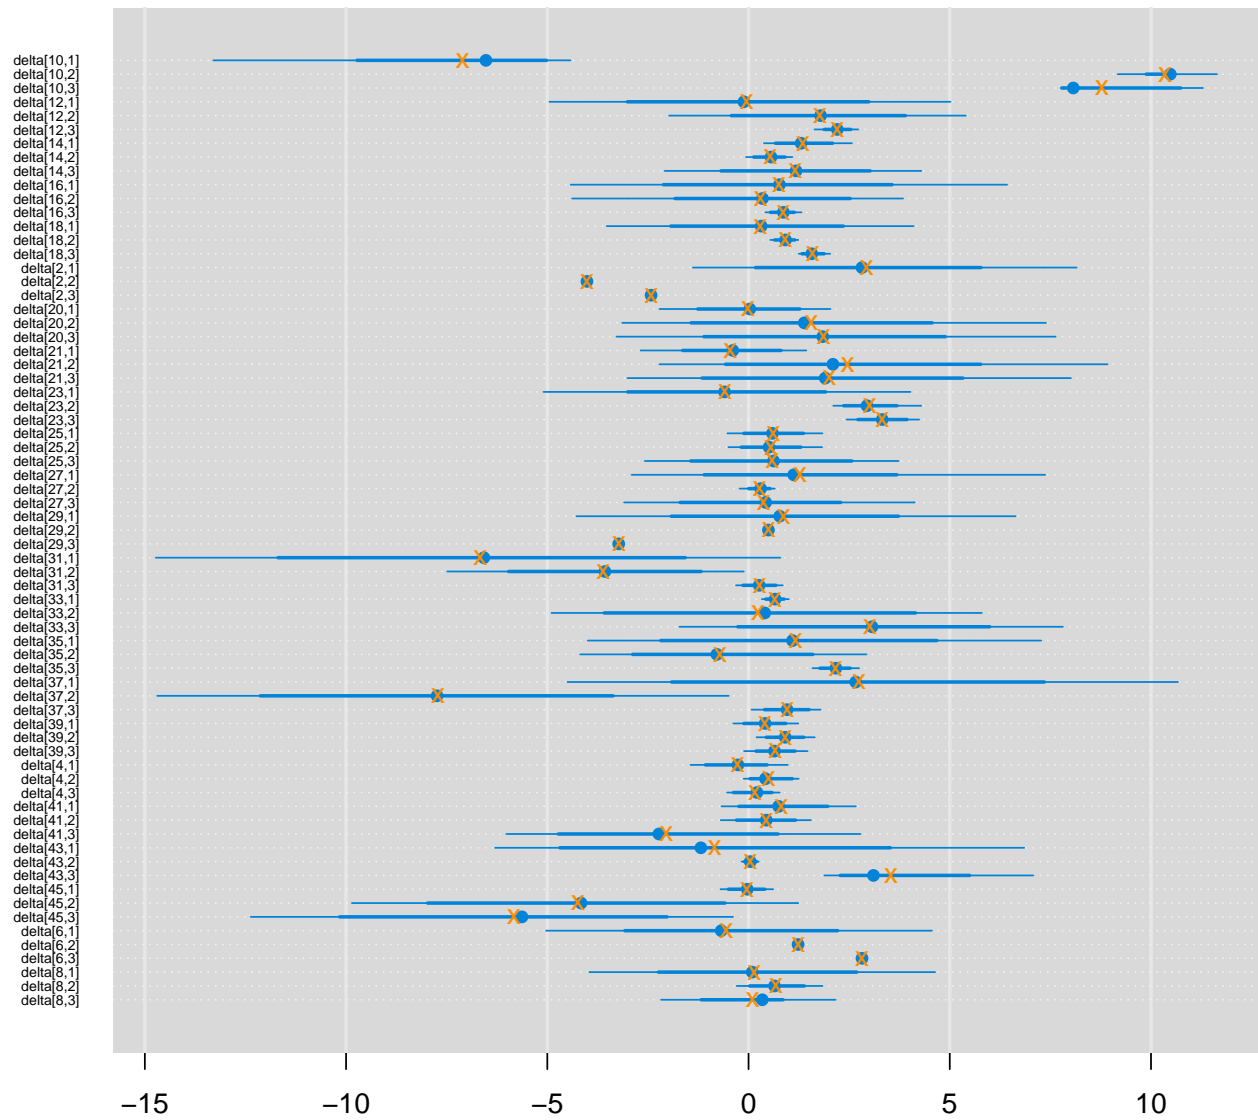

parameters mu

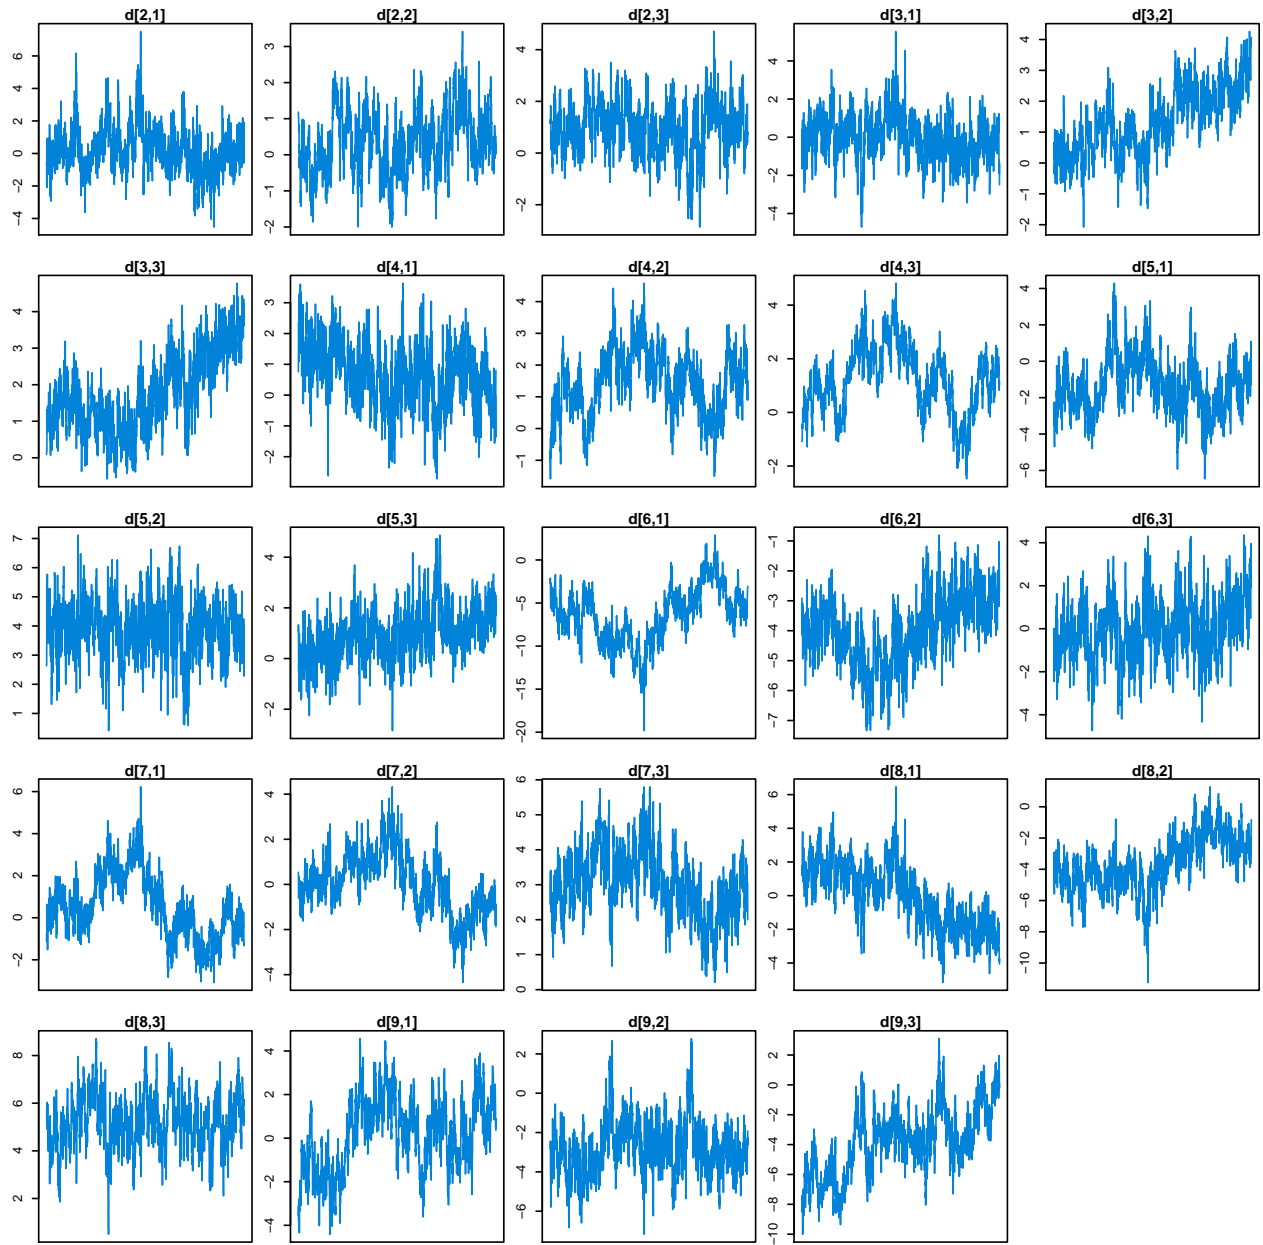

δ (study-specific [random] treatment effects)

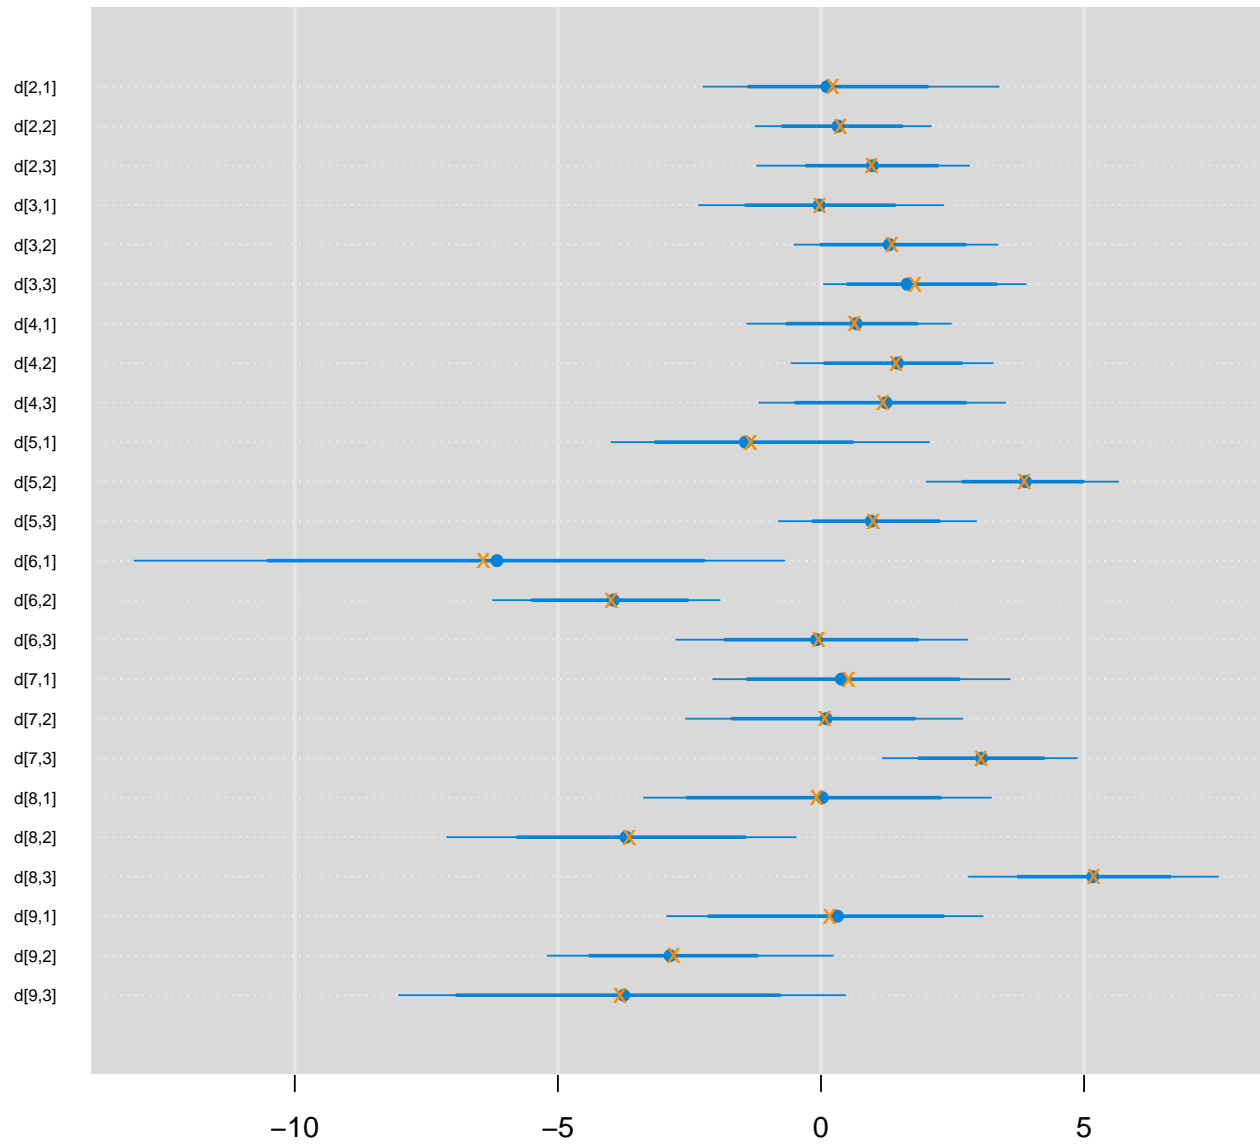

parameters delta

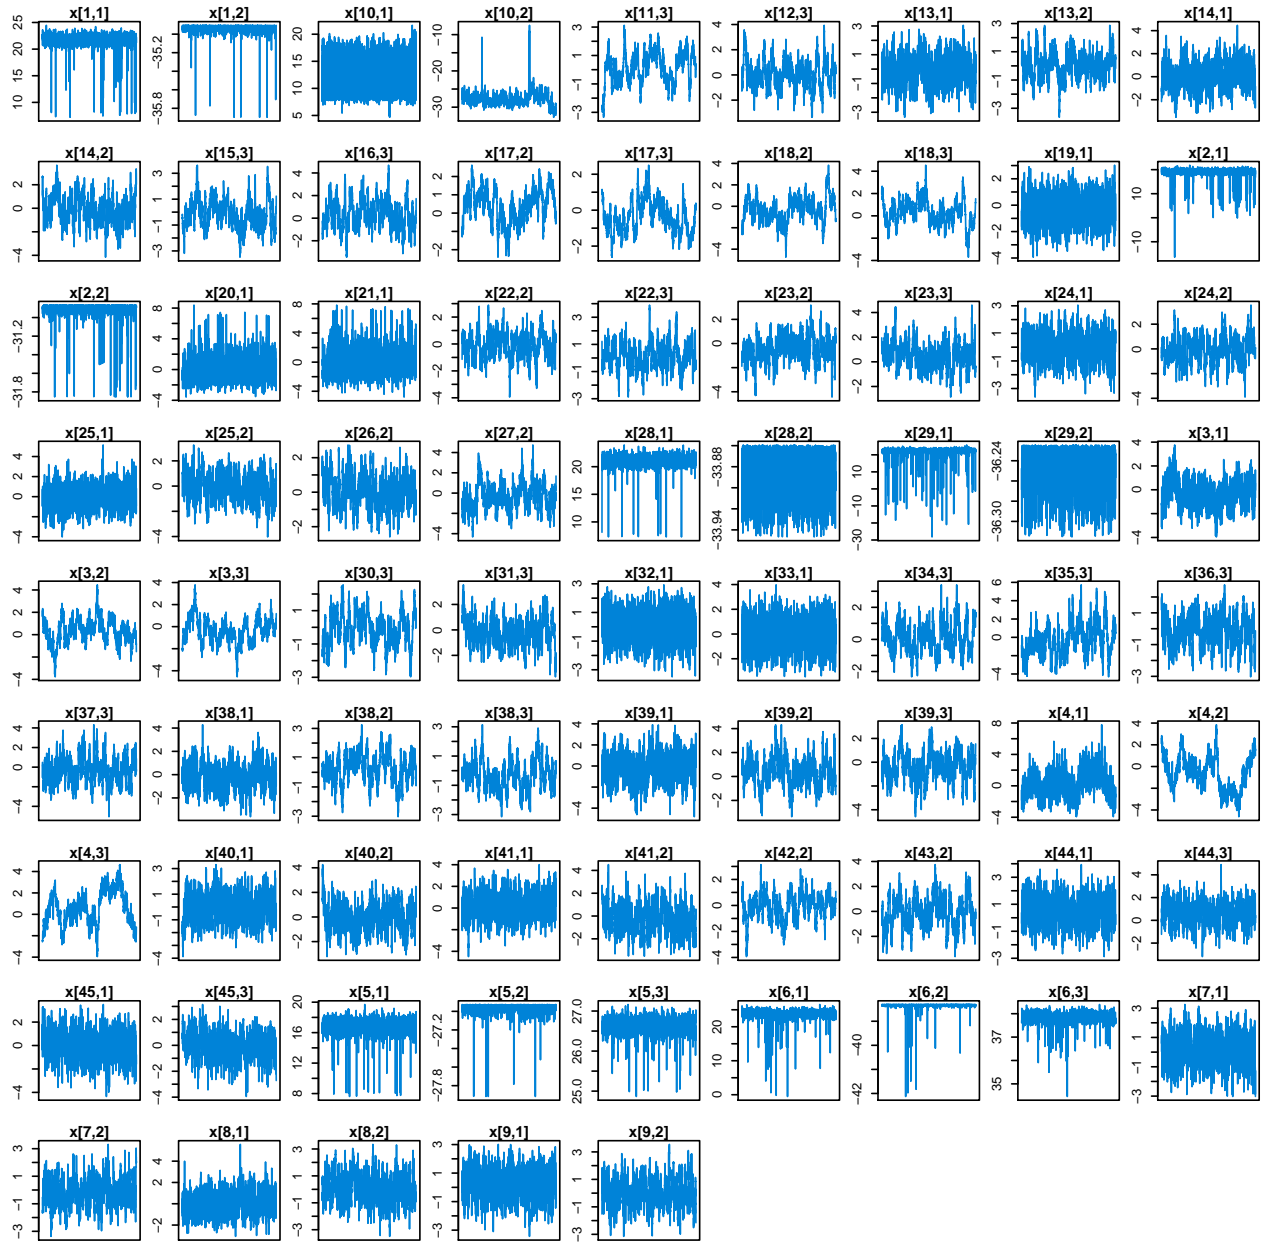

d (pooled treatment effects across trials)

parameters d

x (latent variables)

parameters x
